SCRUM Meeting 2 for Speech Expression
Prepared by: Danny Chen, Tyler Nichols
Meeting Date: April 5th

Meeting Attendees

1. Danny Chen
2. Mark Sturtevant
3. Tyler Nichols

Meeting Agenda Items

- Updates on everyone's project progress
- Discussion on the organization of the code base

Status Update Since Last Meeting

Accomplishments:
- Counting filler word frequency and repeated words/phrases is working as expected.
- Added hardcoded chart.js
- Organized code base. In previous versions, we would pass React props from App.js into a child component. This ended up having lots of props and hard to find errors. We organized our code and now there are only 1-3 props that are passed from parent to child.

Tasks Completed:

Task Description	Assigned to	Completed?
Counting filler word, repeated words, and repeated phrases and then displaying the result in summary page.	Mark	yes
Organize the code base to prevent long props that are passed from the parent to the child component.	Danny	yes
Updated most recent website on Heroku	Danny	yes
Develop basic timer function.	Tyler	partial

Before The Next Meeting

Plans:
- Begin on the document for sprint 1.

- Discuss presentation plans for next week
- Finalize git repository for the next demo in lab.

Task Assignments:

Task Description	Assigned to
Complete Sprint 1 documentation.	Tyler, Mark
Discuss presentation plans for next week.	All
Finalize the project git repository; update the hosted website with any changes.	Danny
Finalize initial timer function.	Tyler

Minutes from Previous Meeting

In the previous meeting, we discussed on plans for finishing the summary page layout. This is now finished and we even and went ahead with organizing the code. Mark was also ahead and finished finding the repeated words/phrases in the transcripted script. Tyler is working on our initial timer feature, and he should make marked progress by the next scrum meeting.
